TUITION: \$136.00 PER SEMESTER HOUR/\$408.00 PER COURSE

Monday and Wednesday 4:30 – 7:00 PM

SSC 101 The Human Behavior Perspective An interdisciplinary course designed to provide students with the opportunity to consider the many ways in which human beings function as individuals, as members of larger groups and demographic segments, and as members of a particular culture. This course explores the disciplines of Sociology, Psychology, and Anthropology. (Casstevens)

Monday and Wednesday 7:00 – 9:30 PM

ENG 002 Basic Composition Skills This course is designed to remedy the special problems of students whose English preparation reveals marked deficiencies in verbal skills. NOTE: This course does not satisfy a General Education requirement. (Mucchetti)

ENG 121 Academic Writing I (Prerequisite: ENG 002 or satisfactory score on English Placement Test) The techniques of effective writing, logical thinking and intelligent reading, with special emphasis on expository writing. To ensure competence in oral communications, a speech component is included. (Mucchetti)

Tuesday and Thursday 4:00 PM

MAT 128 Algebra and Functions (Prerequisite: MAT 003 or satisfactory grade on the mathematics placement test) Designed to provide a beginning background on functions that will enable the student to advance and succeed in higher level mathematics courses. Algebraic concepts with emphasis on functions and graphing. Topics include rational expressions and equations, functions and graphs, rational exponents and radicals, quadratic equations and functions, and systems of linear equations. (David)

MAT 003 Basic Algebra This course is designed to help students build a foundation for algebra. Topics include: algebraic expressions, order of operations, linear equations, inequalities, introduction to graphing, polynomials, exponents and factoring. NOTE: This course does not satisfy a General Education requirement. (David)

Tuesday and Thursday 4:30 – 7:00 PM

MGT 327 Management Information Systems (Prerequisites: MGT 301, COM 130) A study of important uses of information technology in organizations. Issues studied include information requirements and flow, systems design and analysis methodologies, the generation and accumulation of data for decision-making and the implementation and control of information systems. **VTT course** (Boldin)

Tuesday and Thursday 7:00 – 9:00 PM

SCI 101 Integrated Physical Science This course introduces students to the concepts and practical applications of the physical sciences. Specific themes focused on will include the scientific method, history of science, thermodynamics, electricity, waves, atomic structure, nuclear energy, relativity and the formation of the earth and universe. **VTT course.** (Skena)
